LITTLE BEAVER®
EARTH DRILLS & AUGERS

Hydraulic Earth Drills – Towable

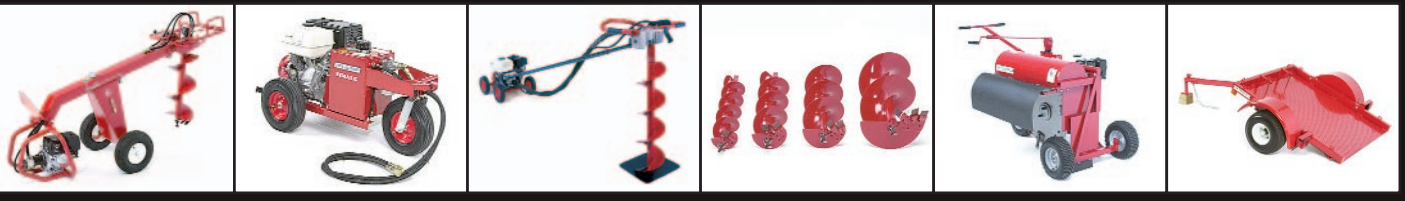
- Powerful, reliable, safe
- Forward and reverse auger rotation
- Accepts 36″ or 42″ auger lengths

Applications:

- Rental
- Fencing
- Decks
- Sign erection
- Landscaping

Hydraulic Earth Drills — Towable

Complete line of one-man earth drills, augers and mini-trenchers



Power...versatility...dependability

Little Beaver's towable, hydraulic earth drill certainly has all of that…and more. When we designed the HYD-TB11H, we weren't interested in developing an ordinary, "me too" machine. Our goal was to design a towable, hydraulic earth drill that was clearly superior to any competitive offering currently on the market. And that's exactly what we did.

Pneumatic wheels let you easily move the HYD-TB11H without damaging turf. The machine is incredibly well balanced, requiring less than 20 pounds of force to pivot to the digging position.

The towable design saves valuable truck or trailer space. Simply install the standard, removable tow bar, attach to your 2" ball, and connect the safety chains.

Hydraulic Earth Drills – Towable

MORE POWERFUL

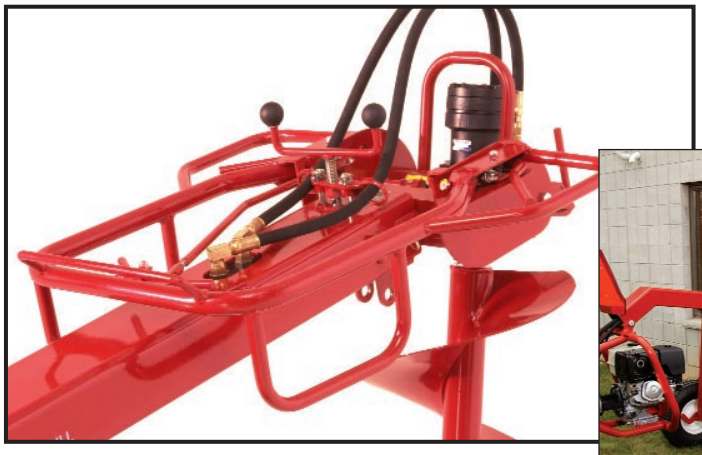
We started with an 11 HP Honda engine. Then, we added a hydraulic system that's second to none. This powerful combo generates up to 262 foot pounds of torque, letting you easily drill holes up to 16″ in diameter.

MORE VERSATILE

The HYD-TB11H features convenient forward and reverse auger rotation and a two-position handle that permits drilling right next to buildings or other structures. An infinitely variable 20 degree auger tilt allows vertical drilling in uneven terrain while our removable "no tools" tow hitch permits easy highway transport.

MORE DEPENDABLE

The HYD-TB11H is built to last with welded steel plate and tube construction for extra long life. By combining an inlet suction strainer with a 10 micron return filter, the hydraulic system is kept clean of contaminants. And the entire machine is backed by a one year, limited warranty.



The two-position handle rotates 180 degrees, allowing you to drill right next to buildings, walls, or other obstructions. An infinitely variable 20° auger tilt provides vertical drilling in uneven terrain.

CONVENIENT FEATURES MAKE YOUR JOB EASIER

Forward/reverse hydraulic levers and an on/off switch are conveniently located on the two-position handle.

An auger lock makes it easy to maneuver the HYD-TB11H around the job site.

A large, 6.5 gallon hydraulic reservoir features a convenient sight gauge and a 10 micron return filter.

The HYD-TB11H accepts all Little Beaver augers (standard, carbide, and rock), utilizing the same secure and simple snap button connection. Either 36″ or 42″ augers can be used.

EARTH DRILLS & AUGERS

Hydraulic Earth Drills — Towable

HYD-TB11H SPECIFICATIONS

Engine	
Brand / model	Honda GX340 OHV
Horsepower	11 hp
Oil alert system	Std.
Hydraulics	
Forward / reverse	Std.
Maximum auger speed	141 rpm
Maximum auger torque	262 ft. lbs.
Maximum flow	6 gpm
Maximum pressure	2500 psi
Reservoir capacity	6.5 gallons
Return filter	10 micron
Inlet suction strainer	Std.
Sight level gauge	Std.
Other Features	
Construction	Welded steel plate & tube
Handle	Two-position
Auger tilt	20 degrees each direction
Auger vertical lock	Std.
Auger transport lock	Std.
Towing	
Removable tow bar	Std.
SMV sign	Std.
Ball hitch	2″
Tires	5.7-8 highway rated
Dimensions	
Overall length	106″
Length with handle folded	93″
Height	43″
Width	34″
Shipping weight (dry)	575#
Warranty	One year
